Two days National Conference

Impact of Information Technology, Animation, Gaming & VFX on Society

18th & 19th May 2015

Venue:

**Senate Bhavan Auditorium
Manasagangothri, Mysore-06**

India has emerged as the Asian destination of choice for animation with the rapid expansion in the animation industry. The art of Animation, a creative field dominated by the West, now has India running as one of the most serious contenders. Media and entertainment are the most emerging and fast growing industries in India and the whole talent is taking notice of the efficiency, skill and talent available in the country in these fields. To aid further growth of these industries, it is extremely important that formal and professional level workshops, discussions and seminars are the best platform. In order to sensitize and create awareness among the youth about job opportunities in the area of Information Technology, Animation, Gaming and Visual Effects (VFX) this conference is arranged.

The conference will provide a platform to students, IT professionals from the IT industry and Animation industry to discuss and exchange the latest advances and career opportunities in the field of information technology, animation, gaming and visual effects. Information technology and animation has encompassed almost all fields of society. This unique conference will inspire the students who are in search of creative careers.
